

PRIME NEWS

PRIME NEW YORK: THE CONSULTANT OTHER POLITICAL CONSULTANTS TURN TO.

Election 2017 has begun and campaigns of all sizes are looking for an advantage

If your campaign doesn't have a data strategy or wants an alternative to the out-of-date file you're using, allow Prime New York to empower your campaign with targeted, high quality and low cost data. If your campaign already has a data provider but the only data they've sent you on-time is their big bill, give us a shot to turn your order around in less than 2 hours at a better price.

Here's the advantage Prime New York can give your campaign

- **Quality:** With over 25 years of experience in New York politics, we have the highest quality voter and commercial data available to help your campaign hit your target voters. And because we come from New York, we know the difference between Richmond Hill and Port Richmond, New Castle and North Castle and Otsego and Oswego
- **Speed:** Don't get slowed down by your voter data provider. Call us and we'll turn around even the most complicated custom jobs fast.
- **Price:** Prime New York has served both Presidential campaigns and local municipal elections. The only way that's possible is by providing our customers with pricing to fit any campaign budget. With Prime New York, you only have to purchase the voters you want to contact. We don't require anyone to buy more voters than they really need.
- **Tailored:** We'll provide what you need. If you just want land line telephones in certain election districts, we'll get that to you or if you want only cell phones for test messaging or a walking list for GOTV, we'll handle that also.

Recent additions to our voter file now include:

- Complex householding to confirm most likely household groupings
- Landline and cell phone matching from five national commercial sources
- Analysis of family characteristics
- Calculation of likely marital status
- Ethnic and religious identification for @90% of voters
- Commercial file attribute appending for nearly 200 separate attributes including income, education, occupation and much more
- Application of proprietary hot button issue models and private self-reported issue data
- Lifestyle and interest coding from commercial data sources
- Census data conversions and application of American Community Survey Data

PRIME
NEW YORK

Dear Friends,

Prime New York is once again producing Prime News, a report with final New York City election results from the last year, along with some material about our products & services. The report now is a PDF that you can print out & share via email with others who might be interested. If there is anyone you think might be interested in joining our email list so they can receive this year's and future editions, send us an email at primeny711@aol.com, with the contact information.

The Prime New York Difference

Quality over size

Prime New York has the most accurate voter file in New York due to scores of human and automated checks that remove deceased voters, voters that have moved, duplicate records and those individuals with invalid registrations. Some of the checks our partners at L2 perform as part of our complex data processing:

- Duplicate record analysis and removal
- Garbage record identification and cleaning
- Major and minor district processing and checking
- District enhancements and supplementation through intermediate mesh annotation coding
- Vote history processing and checking
- Name parsing and cleaning
- Addition of missing gender codes
- Mailing city name corrections and standardizations
- Coding Accuracy Support System (CASS) and Locatable Address Correction (LACS) processing
- Post CASS street name and address corrections
- Social Security Administration Death Index Matching
- Geocoding with rooftop level latitude and longitude
- Imputation of missing registration dates
- Commercial data file supplements for missing birth dates and apartment numbers
- National Change of Address (NCOA) processing
- Complex householding to confirm most likely household groupings
- Identification of voters missing critical districts and assignment of those districts
- Census data conversions and application of American Community Survey Data

What about phones?

We probably have less phone numbers on our New York voter file than other vendors or the State parties have on theirs. But as anyone who has worked with those other voter files can tell you, a bunch of bad phone numbers doesn't do a campaign any good.

We get landline and cell phone matching from five national commercial sources three times a year and can include a telephone confidence code on our voter files, so campaigns can know which phone numbers are most likely to still be working numbers.

Why pay more?

In the end our goal isn't to just perform more checks than any other company but it's to provide the highest quality file with the most accurate information in order to save our client's money and produce the best results. Data quality matters because sending 10, 20, 30 thousand extra mailers, emails, dialing wrong numbers or placing targeted digital ads that aren't going to the right voters or voters at all wastes time and money.

Contact Stu Osnow or Jerry Skurnik at 212-587-8080 or at primeny711@aol.com for free counts and to get more information about how Prime New York can help you communicate with your voters.
